

# 4. Addons

- Introduction
- Installation

## Introduction

There are several Addons available to be installed to add functionalities to the Soffid Console. These addons can be found at: <http://www.soffid.com/download> in the Addons section.

**soffid** Download open source components

You can download any of the following binary components for free. To keep track of our software usage, a **free registration process is required**. If you prefer not to give us your data, we respect your privacy and let you download source code version without further requirements.

According to European Privacy laws, if you gave us your data, you can request us to update or remove it using our [contact form](#)

- Soffid Console [Download](#) [Get source code](#)

  - SOAP Webservices [Download](#) [Get source code](#)
  - SCIM addon [Download](#) [Get source code](#)
- ESSO Enterprise Single Sign On

## Installation

To install these addons, please log in to the web console, by browsing to:

- [http://SERVER\\_NAME:8080](http://SERVER_NAME:8080)
- Enter admin credentials (admin/changeit)

Then navigate to Start > Soffid Configuration > Addon management,

Upload

Restart console

Plugin

- LDAP plugin version 2.5.0
- SQL plugin version 1.6.1
- Windows plugin version 4.0.4
- SCIM plugin version 1.2.1
- REST Web service plugin version 1.2.2
- Soffid Report addon version 2.1.2
- GoogleApps plugin version 2.0.2
- Shell plugins version 1.2.2
- Zimbra plugin version 1.0.7
- Test plugin version 2.0.2
- Amazon WS plugin version 1.0.0
- Soffid SCIM REST Web Service version 1.1.1
- Soffid core Web Services version 2.0.2
- Soffid Identity Federation version 2.3.0
- Soffid Remember password version 2.0.3

Click on Upload to select an addon to install:

 Upload  Restart console

Plugin

- LDAP plugin version 2.5.0
- SQL plugin version 1.6.1
- Windows plugin version 4.0.4
- SCIM plugin version 1.2.1
- REST Web service plugin version 1.2.2
- Soffid Report addon version 2.1.2
- GoogleApps plugin version 2.0.2
- Shell plugins version 1.2.2
- Zimbra plugin version 1.0.7
- Test plugin version 2.0.2
- Amazon WS plugin version 1.0.0
- Soffid SCIM REST Web Service version 1.1.1
- Soffid core Web Services version 2.0.2
- Soffid Identity Federation version 2.3.0
- Soffid Remember password version 2.0.3

Then, select the .jar file and upload to console:

Upload Restart console

Plugin

- LDAP plugin version 2.5.0
- SQL plugin version 1.6.1
- Windows plugin version 4.0.4
- SCIM plugin version 1.2.1
- REST Web service plugin version 1.2.2
- Soffid Report addon version 2.1.2
- GoogleApps plugin version 2.0.2
- Shell plugins version 1.2.2
- Zimbra plugin version 1.0.7
- Test plugin version 2.0.2
- Amazon WS plugin version 1.0.0
- Soffid SCIM REST Web Service version 1.1.1
- Soffid core Web Services version 2.0.2
- Soffid Identity Federation version 2.3.0
- Soffid Remember password version 2.0.3

**File Upload**

Specify a file located in your local system
